

CLAIM AMENDMENTS

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A method comprising:
accessing stored video content stored at a server, the stored video content including closed captioning content;
identifying a first portion of the stored video content based on the closed captioning content and based on a bandwidth capability of a remote device; and
providing content associated with the first portion of the stored video content to ~~[[a]]the~~ remote device.
2. (Previously Presented) The method of Claim 1, wherein identifying a first portion includes:
searching the closed captioning content for a keyword; and
selecting the first portion of the stored video content based on a location of the keyword within the closed captioning content.
3. (Original) The method of Claim 2, wherein the keyword is indicated by a user.
4. (Original) The method of Claim 2, wherein the keyword includes one of: a single word, a plurality of words, and a phrase.
5. (Currently Amended) The method of Claim 1, wherein identifying a first portion includes:
obtaining a set of parameters including the bandwidth capability; and
selecting the first portion of the stored video content based on the set of parameters.
6. (Original) The method of Claim 5, wherein the set of parameters includes at least one keyword.

7. (Original) The method of Claim 5, wherein the set of parameters includes parameters specifying a specific time period on a specific channel.
8. (Original) The method of Claim 5, wherein the set of parameters is specified by a user.
9. (Original) The method of Claim 8, wherein the set of parameters is specified by the user through a website.
10. (Original) The method of Claim 1, wherein the content associated with the first portion includes a text transcript based on the closed captioning content.
11. (Previously Presented) The method of Claim 1, wherein the content associated with the first portion includes a still image representative of the first portion of the stored video content.
12. (Previously Presented) The method of Claim 1, wherein the content associated with the first portion includes an audio clip representative of the first portion of the stored video content.
13. (Previously Presented) The method of Claim 1, wherein the content associated with the first portion includes a video clip representative of the first portion of the stored video content.
14. (Canceled)
15. (Previously Presented) The method of Claim 1, wherein the remote device includes one of: an alphanumeric pager, a two-way pager, a wireless telephone, and a hand-held computing device.

16. (Currently Amended) A method comprising:
 locating a keyword within a set of text representative of stored video content, the stored video content stored at a server;
 selecting a first portion of the stored video content based on a location of the keyword within the set of text; and
 providing content associated with the first portion of the stored video content to ~~[[a]]the~~
 remote device based on a set of user-specific parameters.
17. (Previously Presented) The method of Claim 16, wherein the set of text is representative of a closed captioning content of the stored video content.
18. (Original) The method of Claim 16, wherein the keyword includes one of: a single word, a plurality of words, and a phrase.
19. (Previously Presented) The method of Claim 16, further including obtaining the keyword.
20. (Original) The method of Claim 19, wherein the keyword is specified by a user.
21. (Original) The method of Claim 20, wherein the user specifies the keyword using a website.
22. (Currently Amended) The method of Claim 16, wherein the ~~content associated with the first portion~~
set of user-specific parameters includes a parameter indicating that the content should be provided as a text transcript based on the set of text.
23. (Currently Amended) The method of Claim 16, wherein the ~~content associated with the first portion~~
set of user specific parameters includes a parameter indicating that the content should be provided as ~~includes a~~ still image representative of the first portion of the stored video content.

24. (Currently Amended) The method of Claim 16, wherein the set of user specific parameters includes a parameter indicating that the content should be provided as content associated with the first portion includes an audio clip representative of the first portion of the stored video content.

25. (Currently Amended) The method of Claim 16, wherein the set of user specific parameters includes a parameter indicating that the content should be provided as a video clip representative of the first portion of the stored video content.

26. (Canceled)

27. (Previously Presented) The method of Claim 16, wherein the remote device includes one of: an alphanumeric pager, a two-way pager, a wireless telephone, and a hand-held computing device.

28. (Currently Amended) A system comprising:
a closed captioning decoder to decode a closed captioning content of stored video content to generate a set of text representative of the closed captioning content, the stored video content stored at a server; and
a content server to select a first portion of the stored video content based on an analysis of said set of text and based upon a bandwidth capability of a remote device; and
a transmitter to transmit content associated with said first portion of the stored video content to [[a]]the remote device.

29. (Original) The system of Claim 28, wherein the analysis of said set of text includes locating a keyword within said set of text.

30. (Original) The system of Claim 29, wherein the keyword is indicated by a user.

31. (Original) The system of Claim 29, wherein the keyword includes one of: a single word, a plurality of words, and a phrase.

32. (Original) The system of Claim 28, wherein the analysis of said set of text includes selecting said first portion of the stored video content based on a set of parameters.

33. (Original) The system of Claim 32, wherein said set of parameters includes parameters specifying a specific time period on a specific channel.

34. (Original) The system of Claim 32, wherein said set of parameters is specified by a user.

35. (Original) The system of Claim 34, wherein said set of parameters is specified by the user through a website.

36. (Original) The system of Claim 28, wherein said content associated with said first portion includes a text transcript based on said closed captioning content.

37. (Previously Presented) The system of Claim 28, wherein said content associated with said first portion includes a still image representative of said first portion of the stored video content.

38. (Previously Presented) The system of Claim 28, wherein said content associated with said first portion includes an audio clip representative of said first portion of the stored video content.

39. (Previously Presented) The system of Claim 28, wherein said content associated with said first portion includes a video clip representative of said first portion of the stored video content.

40. (Canceled)

41. (Previously Presented) The system of Claim 28, wherein said remote device includes one of: an alphanumeric pager, a two-way pager, a wireless telephone, and a hand-held computing device.

42. (Currently Amended) A computer readable medium, said computer readable medium including instructions to manipulate a processor to:

- access stored video content stored at a server, the stored video content including closed captioning content;
- identify a first portion of the stored video content based on the closed captioning content and based on a bandwidth capability of a remote device; and
- provide content associated with the first portion of the stored video content to ~~[[a]]the~~ remote device.

43. (Previously Presented) The computer readable medium of Claim 42, wherein said instructions to manipulate said processor to identify include instructions to manipulate said processor to:

- search the closed captioning content for a keyword; and
- select the first portion of the stored video content based on a location of the keyword within the closed captioning content.

44. (Original) The computer readable medium of Claim 43, wherein the keyword is indicated by a user.

45. (Original) The computer readable medium of Claim 43, wherein the keyword includes one of: a single word, a plurality of words, and a phrase.

46. (Previously Presented) The computer readable medium of Claim 42, wherein said instructions to manipulate said processor to identify include instructions to manipulate said processor to:

- obtain a set of parameters; and
- select the first portion of the stored video content based on the set of parameters.

47. (Original) The computer readable medium of Claim 46, wherein the set of parameters includes at least one keyword.

48. (Original) The computer readable medium of Claim 46, wherein the set of parameters includes parameters specifying a specific time period on a specific channel.

49. (Original) The computer readable medium of Claim 46, wherein the set of parameters is specified by a user.

50. (Original) The computer readable medium of Claim 49, wherein the set of parameters is specified by the user through a website.

51. (Previously Presented) The computer readable medium of Claim 42, wherein the content associated with the first portion includes a text transcript representative of the first portion of the stored video content.

52. (Original) The computer readable medium of Claim 42, wherein the content associated with the first portion includes a still image based on the closed captioning content.

53. (Previously Presented) The computer readable medium of Claim 42, wherein the content associated with the first portion includes an audio clip representative of the first portion of the stored video content.

54. (Previously Presented) The computer readable medium of Claim 42, wherein the content associated with the first portion includes a video clip representative of the first portion of the stored video content.

55. (Canceled)

56. (Previously Presented) The computer readable medium of Claim 42, wherein the remote device includes one of: an alphanumeric pager, a two-way pager, a wireless telephone, and a hand-held computing device.

57. (New) The method of claim 1, wherein providing content associated with the first portion of the stored video content comprises providing content in a format, the format based on a device type of the remote device.

58. (New) The method of claim 1, wherein providing content associated with the first portion of the stored video content comprises providing content in a format, the format based on a set of user-specific parameters.

59. (New) The method of claim 16, wherein selecting a first portion of the stored video content comprises selecting the first portion of the stored video content based on a bandwidth capability of the remote device.
